

Delegate User

1

Pool Administrator

Pool administrator can delegate application(s) from one member to another member in the same user pool

2

Pool Administrator

Click “User Pool” and click “Options” next to the pool member

3

Pool Administrator

Click “Delegate”

4

Pool Administrator

Select a member to be delegated from the pull-down menu and click “Add”

5

Pool Administrator

The application(s) have successfully delegated from one pool member to another pool member

6

After successful delegation, pool administrator and the concerned members will receive a notification in TSW and by email.

7

Pool Member

Pool member being delegated can now see the delegated application(s)
